All investments involve risk and the past performance of a security, or financial product does not guarantee future results or returns. Keep in mind that while diversification may help spread risk it does not assure a profit, or protect against loss, in a down market. There is always the potential of losing money when you invest in securities, or other financial products. Investors should consider their investment objectives and risks carefully before investing. Investors should be aware that system response, execution price, speed, liquidity, market data, and account access times are affected by many factors, including market volatility, size and type of order, market conditions, system performance, and other factors.

Borderless Investing Inc. (“Borderless Investing”), the owner of the Stockal platform, is not a broker-dealer nor an investment advisor. The Stockal platform enables investments in a diverse set of global assets from a single account from anywhere in the world. As such, Borderless Investing makes no warranties or representations, express or implied, on products and services offered through its platform. It accepts no liability for any damages or losses, however, caused in connection with the use of related services.
